

## LIVE WEBCAST

Friday, December 4, 2020 | 9 a.m. CST / 10 a.m. EST / 3 p.m. UTC

### HPI Outlook 2021: What Does 2021 Hold for the Downstream HPI?

Join the editors of *Hydrocarbon Processing* as they present the downstream's most trusted industry forecast. During the webcast, hydrocarbon processing industry (HPI) professionals will gain expert insight into the 2021 spending and activities of the global HPI. During the event, the editors will present projections for capital, maintenance and operating expenditures for the refining, petrochemicals and gas processing/LNG industries for 2021 and how the global pandemic is shaping spending patterns in the future. They will also highlight economic, environmental and industry trends impacting spending for the year ahead. The webcast will also include a Construction Boxscore Database overview of project activities in the refining, petrochemical and natural gas/LNG industries throughout the world.
