

Bringing full site documentation into one solution, DroneDeploy enables you to capture interior, exterior, ground, and aerial data. Allow your team to take a 360 tour of any location to inspect, validate, and comprehend site progress – no matter where they are in the world.

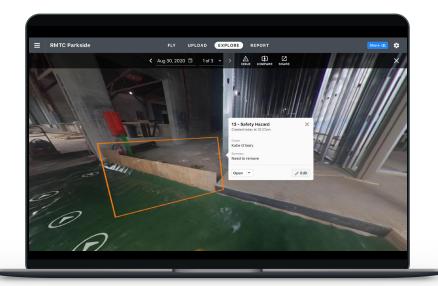

## Create an interactive 360 site walkthrough for your entire team

- Upload and process 360 videos from any 360 camera
- Expedite pre-construction site planning and design from bid to close
- Improve coordination & communication with trades, owners, and executives using a visual record of site conditions

## Virtual 360 tours of your entire site, exterior and interior

- Capture your daily site walkthroughs with any 360 camera
- View prior week or day by floor to assist in daily planning
- Navigate between your 360 videos or dates to track progress
- Compare two points in time to find and create issues
- Review project status with a visual timeline of your job site
- Share issue and progress reports with all stakeholders

The majority of our projects are interior buildouts in the Chicago area. With 360 Walkthrough, we will now have the ability to use DroneDeploy on all of our projects to help in planning, inspection, and safety."

- Ben Stocker, Skender
