

Expand your customer offering

Drone inspections are becoming the new industry standard for rotor blade inspections. Owners and operators are looking for skilled teams to carry out inspections in the shortest possible time. But it takes more to stay competitive.

Together with our partners we have carried out 7000 automated drone inspections of wind turbines in 20 countries around the globe. With our 3DX™ Blade Platform you work with state-of-the-art hardware and software. Our highly interactive data analysis tool is based on one of the largest inspection databases in the market and we apply a highly advanced, AI driven damage recognition algorithm.

OUR PLATFORM OFFERS

Blade Platform

- **Fully autonomous inspections**
Complete up to 17 inspections per day and system, annotations as early as 2 days after inspection
- **Highest quality and reproducible inspection data**
Enable end-customers to optimize their intervention, maintenance and repair strategy as well as monitor damage progression
- **Professional Campaign Management**
Manage your campaigns online and in real time
- **Collaboration and real time inspection data**
Share live data within and across organisations with the 3DX™ Blade Platform
- **Fleet wide blade analytics**
Offer comprehensive tools to filter data for multiple use and monitor blade condition across entire fleets

Some of our clients and collaborations

“The report we get from the 3DX™ Blade Platform allows us to make very detailed estimates on repair costs. Repair quotes are now based on hard facts and more reliable.”

Erhan Özalp
Deputy Operations Manager
Ülke Enerji

Partner with us for a competitive edge

“Shortly after having received the online training on the 3DX Blade Platform I was inspecting 17 wind turbines a day.”

Brandon Gash
Inspection partner,
USA

Become part of our drone inspection team and offer your customers a system with which they can plan their repair campaigns, avoid unscheduled repairs and shutdowns, and gain detailed insights into the health of their entire fleet.

HOW DOES IT WORK?

We are always looking for experienced and professional partners. Getting started is simple and you can get operational straight away. All we ask of you is that you have experience in the wind industry, possess all required HSE certificates and are licensed to fly a drone.

Our partner package includes:

- ½-day online training program
- Certificate of approved partner
- Marketing package
- 24/7 Tech support
- Professional annotation service from leading blade experts
